* and **

25X1 * [redacted] Comment. The first report on Soviet supply traffic handled by the Mustermark marshaling yard indicated only a low volume of Soviet supply movements. However, it was subsequently determined that the report covered only part of the actual supply flow. The present report, covering only the supply traffic for a daily average of eight hours during the period specified, indicates a total of 366 boxcarloads of Soviet supplies. If this is tripled, the total may actually be 1,000 to 1,100 boxcarloads in eight weeks, or a daily average of 19 boxcarloads. This is considered a normal rate of supply traffic handled in the Mustermark marshaling yard.
